GOODBYE DRY INDOOR AIR

A suitable humidity of indoor air is important for our well-being. Excessively dry indoor air causes and increases irritation of the respiratory tracts, eyes, mucous membranes and skin, and exacerbates the symptoms of flus and allergies. Ufox is a Finnish vaporising air humidifier that alleviates these symptoms. The device is reliable, easy to use and lasts a long time.

Suitable indoor air humidity is a significant part of the quality of living

Suitable air humidity helps with the following:

Allergy and respiratory symptoms –
it binds airborne dust and humidifies the mucous membranes

Flu and throat ache –
clears mucus and cleans the lungs

Fatigue and stuffiness –
helps by clearing the airways

Dry eyes and skin irritation symptoms –
moistens the eyes and skin

Air humidifier for the whole family

More information on the benefits of the Ufox air humidifier is available on our site ufox.fi

What is the indoor air humidity in your home?

In most modern homes, indoor air is noticeably dry, especially in winter, and the recommended humidity level is difficult to attain due to the extremely dry outdoor air. There are also other factors that impact the air humidity of households: strong ventilation reduces humidity, and it is further decreased due to mechanised laundry drying and the fact that people tend to cook less frequently than before. The relative humidity of indoor air should be 30–45%. Ufox air humidifiers keep the air humidity in your home at a suitable and comfortable level.

User favourite for 50 years and counting

The Finnish Ufox has been a trailblazer of bacteria-free vaporising air humidifiers for 50 years. The unique and well-known space age design has won many awards and remained largely the same over the years.

Healthy water vapour is bacteria-free

The water is heated sufficiently to ensure that the water vapour that humidifies the indoor air is free of any microbes and impurities.

The silent device never disturbs your sleep

The silent operation of the Ufox humidifier won't disturb your sleep. The thermostat switches the device off if the water runs out.

Long service life and ease of use

Ufox is reliable and has a long service life because it has no parts that would wear in use. Cleaned regularly, it will last a long time.

Designed and manufactured in Finland

The Ufox air humidifier was designed in Finland and its production started in 1971. Ufox air humidifiers are still manufactured in Finland.

Which humidifier is best for you?

Ufox U3S

Electrical power (230 V): 160 W or 320 W
Evaporation rate: 1.5–1.7 / 3.5–4.0 dl/h
Water/vapour temperature: 65–95 °C / 50–70 °C
Height/diameter: 220/380 mm
Power consumption: approx. 0.15/0.32 kWh/h
Water tank capacity: approx. 5 l
** Water tank filling frequency: approx. 12–40 h
* Recommended home/office size: 7–100 m² / less than 20 m²
Half power or full power
Height/diameter: 220/380 mm
Dry weight: 2.3 kg
Automatic power down when water runs out
Splash grate
Cover lock

Ufox HK2

Electrical power (230 V): 160 W
Evaporation rate: 1.5–1.7 dl/h
Water/vapour temperature: 65–95 °C / 50–70 °C
Height/diameter: 210/270 mm
Dry weight 1.5 kg
Power consumption: approx. 0.16 kWh/h
Water tank capacity: approx. 6 l
** Water tank filling frequency: approx. 35–50 h
* Recommended home/office size: 7–50 m² / less than 20 m²
Height/diameter: 210 mm/270 mm
Dry weight: 1.5 kg
Automatic power down when water runs out

* Depends on the purpose of use and ventilation ** Depends on the temperature of the added water, for example

Get your own Ufox and enjoy comfortable indoor air.

Ufox air humidifiers are sold by well-stocked shops and department stores.
